

Oemga HHF142B-V Vane Anemometer

Rental and Application Notes

- Shipping Weight: ~ 10 lbs.
- High-quality instrument providing accurate air velocity and volume flow measurements
- Automatically calculates the volume flow rate from the duct
- The duct size is automatically stored in memory on turn-off and up to 10 unique duct sizes can be stored and recalled for frequent use.
- Optional umbilical extension and support rods are available upon request

	Specifications
Weight	2lbs
Dimensions	16.5" x 3.25" x 1.5"
Power	3 "AA" alkaline batteries
Range	0.2 to 40.00 MPS (40 to 7800FPM)
Accuracy	+/- 1% of reading / + 1 Digits
Outputs	0 - 5 V analog signal
Operating Temperature	0° C to 50° C (32° F to 122° F) Probe: -20° C to 100° C (-4° F to 212° F)
Probe Diameter	2.75"
Battery	NiMH rechargeable pack 4.8V max
Display	0.5" LCD, 4 -digits
